DETAILED ACTION

Information Disclosure Statement

 The IDS filed on 6-27-2003 has been accepted and signed by the examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35
U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 6, 7, 8, 9, 12, 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kell (U.S. Patent 5,924,057).

Regarding claim 1:

Kell discloses a method for preventing fraudulent tampering of an odometer disposed within a vehicle, comprising: determining whether the vehicle has been driven for a predetermined period of time (abstract, Col. 3-4, Lines 5-8); counting a number of pulses on an input to the odometer during the predetermined period of time (Col. 3-4, Lines 5-8); and signaling an odometer fraud condition based on the number of pulses and said determining whether the vehicle has been driven for the predetermined period of time (Col. 3-4, Lines 5-8).

Regarding claim 9:

Kell discloses a method for preventing tampering of a recording device disposed within a vehicle, comprising: determining whether the vehicle has been driven for a predetermined period of time (Col. 3-4, Lines 5-8); counting a number of pulses on an input to the recording device during the predetermined period of time (Col. 3-4, Lines 5-8); comparing the counted number of pulses with a predetermined threshold (Col. 3-4, Lines 5-8); and if the vehicle has been driven for the predetermined period of time and if the counted number of pulses is less than or equal to the predetermined threshold, then signaling a fraud condition (Col. 3, Lines 38-52).

Regarding claim 4, Kell discloses a gear shift position (Col. 2, Lines 30-42); Regarding claim 6, Kell discloses pulse are received on the input to the odometer (Col. 3, Lines 5-13); Regarding claims 7, 13, Kell discloses computer medium instruction (fig. 2, unit 30, 34, 24); Regarding claims 8, 14, Kell discloses memory and a controller (fig. 2, unit 30, 32); Regarding claim 12, Kell discloses digital odometer (abstract).

Claim Objections

3. Claims 2, 3, 5, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all the limitation of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: prior art fail to teach fraud condition is signaled when the number is zero, the predetermined time is at least one hour, the error to be displayed on the odometer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowable Subject Matter

4. Claims 15-17 are allowed.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:
Independent claim 15 contains allowable subject matter. None of the prior
art of record shows or fairly suggests the claimed invention.

Regarding claim 15:

The primary reason for the allowance of claim 15 is the inclusion of the method steps of determining whether the vehicle has been driven for an hour and causing the error indicating to be displayed on the odometer. It is these features found in the claim, as they are claimed in the combination,

that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 16-17 are allowed due to their dependency on claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung S Lau whose telephone number is 571-272-2274. The examiner can normally be reached on M-F 9-5:30. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Barlow can be reached on 571-272-2269. The fax phone numbers for the organization where this application or proceeding is assigned is 703-872-9306

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
